VANE-WHEEL SINGLE-JET FLOW SENSORS FOR HEAT METERS (DN15-40)

JS90-NC; JS130-NC

APPLICATION

For cooperation with indicating calculators of heat meters or for measuring the flow and volume of water with a temperature up to 90°C (JS90-NC) and 130°C (JS130-NC) or 30% water solution with glycol with a temperature up to 30°C, on the maximum working pressure up to 16 bar (PN16). Recommended mounting in heating installations – central heating or hot water storage tanks (for circulation systems) in residential or industrial buildings. Suitable for installation in the horizontal hoses (pipelines) **H** (JS90-NC and JS130-NC) with the counter directed upwards or in vertical hoses **V** (JS90-NC).

JS90-NC

JS130-NC

METROLOGICAL CLASS (GUM):

- JS90-NC class **B – H, A – V**
- JS130-NC class **A – H**

NC – pulse transmitter with standard 2 m cable – remote transmission of volume counting

PRODUCT FEATURES

- Low starting rate
- Easy reading of the water meter counter
- Hermetic counter
- Counter mechanism with blockade against multiple rotating, at rotation angle more than 360°
- Resistance against the external magnetic field
- Readings reliability
